## The New Marmon "68"

**Marmon's Great New Achievement**  
A STRAIGHT EIGHT  
AT THE  
PRICE OF A SIX

HERETOFORE the straight eights, almost without exception, have been cars sold in the higher and medium priced ranges. Marmon has changed that and in the new "68" has brought the most modern type of straight-eight transportation into the province of lower prices.

This new "68" is an entirely different species of automobile from that previously offered to the moderate priced buyer. It's smooth....It's quiet....It's powerful....Ease of riding, too, is definitely there—approaching the comfort of far more costly transportation....And equally important to you—it's remarkably good looking—something to admire.

For once here is a car of spectacular performance, broad utility and striking economy that at the same time achieves a distinction and individuality previously found only in cars of far higher quality. And remember, too, the "68" is a full sized five-passenger automobile for a man and his entire family to enjoy.

Every inch of this new "68" is true-blue Marmon—everything that Marmon has been in the past—and so much that Marmon hopes to hold in the future. If you would know just how far reaching is this great Marmon development—please try today the New Marmon 68.

Peter McIntyre, of Ensign, desires to gratefully acknowledge the kindly enquiries of neighbors and other friends, and the courtesies extended, during the period of his illness at a Calgary hospital, and in this connection to specially mention Calgary Elks Lodge No. 4, Ensign Ladies Aid and Nanton Oddfellows.

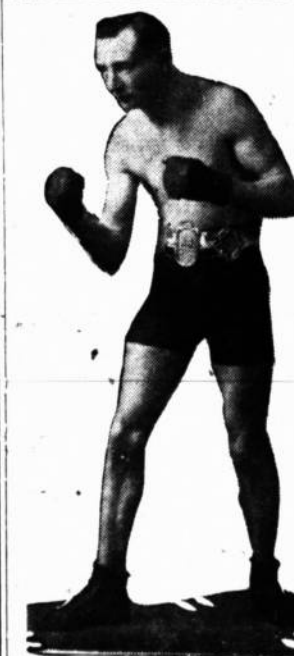

## LOCAL NEWS ITEMS

The Georgian Singers and Players at Vulcan, Wednesday, May 2nd.

Decorated Rooms, near C.P.R. station, main street, Vulcan. Rates 50c., 75c., \$1.

The C. B. Shimp land company report the sale of the east half of section 1-18-24, w4, to Mr. Jack Smith, of Vulcan.

The suggestion has been made that Vulcan organize a series of "good-will" trips, and this journal is pleased to pass along the suggestion to all who might become interested for their consideration. The idea is to assemble all the cars and people available and just pay a neighborly call at the several towns in the territory, taking the brass band along to convey by music the message of our friendliness. These trips could well be run on the Wednesday half-holiday or on the occasion of a ball game in which we might be interested. Think it over, you folks.

YOUNG COWIE  
Calgary boxer, who will be the contender against Louis Kwiczak, for lightweight championship of Alberta, in the feature bout of the boxing card, at Vulcan, on Saturday night next, May 5th.

Take your Kodak with you every time you go motoring and load it with Kodak film, the dependable film in the yellow box.

J. F. MILLER, Eye Specialist visits here monthly. Enquire for dates.

## CARD OF THANKS

The members of the family of the late John Burr desire to convey their thanks to neighbors and other friends for their assistance and sympathy extended during the period of bereavement, and to express appreciation of the tributes paid to deceased, also to thank those who so kindly took part in the funeral and burial services.

## LOCAL NEWS ITEMS

Mrs. Tengen and Miss Nan Tengen, of Calgary, are in town this week, taking account of their property here, and have expressed admiration of the improvements which are apparent to them. Mr. P. E. Fleming was a caller at The Advocate last week, just prior to his return home to Idaho. He had been for some time in the Vulcan district looking after his land, which is henceforth to be farmed by his sons.

The call has been issued for a general assembly and practice of the footballers on Monday evening, when Captain Carlington will make a start on the line-up of the team for the season. All who desire to make the team will be given a try-out on this night or at any other time when there is prospect of adding strength to the team. The boys have not been making much noise as to the team that they will have, but the known players that are about indicate that Vulcan will be there or thereabouts when the championships are determined.

Radio broadcast the information on Monday night that the management of the Calgary exhibition and stampede had decided to make a tournament and contest for bands a feature of their great annual event. More than a thousand dollars will be offered as prizes and there will be trophies and medals. Vulcan will have a particular interest in this provincial event, for the local band will be an entry, and because also of the fact that the idea originated here with Bandmaster Ober, who in person presented the plan to the exhibition manager and has since been in communication with band leaders throughout the country as a contribution to the promotion of the project. Details will come later, and in the meantime local interest will continue to increase in the preparations being made by our band to ensure a creditable showing in the contest, an ambition and effort that cannot but be an advantage to the town and territory.

Louis Kwiczak and Young Cowie, two of the best boys in the business, have been matched as the principals in the head-line bout of a boxing card to be staged by the Canadian Legion, at the municipal rink in Vulcan, on Saturday night, May 5th. Interest will be added by the fact that the contest is for the lightweight championship of Alberta, and both men will weigh-in on the day of the contest. Billy Kaplan of Drumheller and Bob Canuck of Calgary, nifty and sturdy scrappers who are always keen to mix it, will provide the semi-windup. There will be novelty in the match between Young Ray and Bill Court, a white chap and a colored lad, and both real boxers. There will be two preliminaries between two pairs of local juniors, matched to produce even much greater excitement than is usual with the opening numbers, on these festive programs that are becoming so immensely popular. This card is presented by the boys of the Canadian Legion as their best offering so far, and the line-up of the talent certainly gives it that appearance. Claire Kimball and Mayor W. E. Butchart will again be the chief of the staff of officials.

## LOCAL NEWS ITEMS

Many persons jump at conclusions and call them convictions.

K. R. McLean, registered optometrist, 212 Herald Building, Calgary, desires to announce that he will make his monthly visit to Vulcan, at King's drug store, Saturday, April 28.

Vulcan is to receive splendid publicity in a special number of The Lethbridge Herald which is to issue at a near date. This number may be anticipated with more than ordinary interest by readers in Vulcan and vicinity.

The young people's monthly service will be held in the United Church, on Sunday evening, at the usual hour. Rev. Mr. Brunton will take for his subject "Lessons we can learn from the life insurance agent." Special music will be rendered by the young people's choir of the church. Everybody welcome.

District Engineer Frame, employed in the provincial public works department, was in Vulcan this week and, with Secretary Flood, of the municipal district of Royal, was out in the territory making the necessary survey for the replacing of the bridges taken out by the spring freshets. There is considerable of this work to be done.

The Canadian Legion are seeking permission from municipal authorities for the temporary removal of their present building across the lane to the premises in the rear of the D. C. Jones drug store. This would indicate satisfactory progress in the proposition to build the memorial hall, which is the splendid ambition of the vets, and receiving general and generous support of the citizenry. Everybody pictures in their mind the excellent and substantial building that it will be, affording community facilities that have long been required in town.

The Presbytery of High River will hold its spring meeting in Vulcan, at the United Church, on Thursday next, May 3rd, commencing at 11 a.m. In connection with the above meeting a convention of the women of the Presbytery will also be held, when a large delegation from Granum, Claresholm, Staveland, Parkland, Nanton, Cayley, High River, Okotoks, Blackie, Brant, Ensign, Champion, Carmangay and Vulcan will assemble to discuss questions of interest to the women of the church. The afternoon session will open at two o'clock and all the ladies of Vulcan are cordially invited to attend. This is a good time to get acquainted and a large attendance of the ladies of Vulcan is requested.

Directors of the Vulcan Oils Limited made a visit to the field in Turner Valley on Tuesday. All are business men in Vulcan, except President Spooner, who now resides in Calgary, and those who made the trip from Vulcan were Messrs. L. H. Stack, G. M. Carson, D. C. Jones, Wm. Peterson and A. J. Flood. It was a general spring survey of the field and an inspection of wells No. 1 and No. 2. No exceptional plans were determined, and the regular work of making both revenue producers will be continued, and with every prospect of real success. An interesting event in connection with the trip was the blowing-in of the Royalty No. 8, an adjoining well, and what they saw and heard was certainly a real experience for men who have such an interest and investment as these in this particular field. They bring back to Vulcan and to the shareholders here and hereabouts a satisfactory message.

Married, in Vulcan, on April 22, 1928, Mr. Robert Alexander and Miss Lavorne Vaughn. The ceremony took place at the home of Mr. and Mrs. Art Vaughn, parents of the bride, and was followed by a wedding dinner, the guests including relatives and a number of the young friends of the principals in this interesting event. The bride, who was prettily attired for the occasion, is in every particular a Vulcan girl, having spent from childhood to marriage in town, participating in and contributing to the local activities in which a girl of vivacity and talent is interested, and last season was her best with the basketball team. Those to whom she has been so well known will join in general good wishes for the success and happiness of the young folks in their new relationship. The groom was for a time a resident of Vulcan, but lately has been located at Calgary, where now another home is to be established. The gifts to the bride, which were numerous, included those contributed in connection with a shower promoted by girl pals some short time previous to the marriage.

## LOCAL NEWS ITEMS

In the year 1926 the average return per farm from the sale of agricultural products, in Alberta was \$3422 and in 1925 \$3165.

The foundation has been put in for the warehouse and salesroom that is being erected for Mr. Paul Wittcock, of the Vulcan Light and Power Company. This building is being erected at the rear of the opera house and will fill a gap that for so long has not given much to good appearances. Besides being a splendid place of business it will make a fine contribution to town improvement.

Returning in response to request, the now famous Georgian Singers and Players will be the attraction at the Vulcan theatre on Wednesday, May 2nd. They are well described as a goodly company of artists of high renown, in singing, playing and divers frivolties. Those who have previously heard them have been pleased to personally broadcast the message of their excellence. Miss Jessie Mitchell and Mr. Matthey Copeland were married in Calgary on Wednesday of last week. Miss Mitchell is the daughter of Mr. and Mrs. Robert Mitchell, of Vulcan district. Mr. Copeland has also been a resident in the same district for some time, and will be remembered as one of the players last season with the Union Jack football team. They will reside in Calgary, and with them to their new home in the city will go the best wishes of many friends in the Vulcan district, among them The Advocate man.

There is not much to report in connection with the municipal hospital proposition. Progress will cover the situation. Architect Blakey has communicated with the local board in reference to the report of the engineer as to soil tests and other particulars of the proposed site. It would appear that all is well in this regard and it is a reasonable conclusion that the matter of securing tenders and awarding building contracts will be undertaken at a near date. The very nature of the institution and the process according to the law in the matter does not make for speed, but it provides as near as possible a certainty of the requirements. The board of managers are not permitting any delay in the enterprise.

When the crew of workmen were suddenly called off the job at the C. P.R. depot, one afternoon last week, there was much speculation locally as to just why. It is known that there is some considerable difference in the opinion of townspeople as to what Vulcan requires and merits in the matter of station facilities and the improvements which the railway authorities evidently intend to provide. With the suspension of operations hope prevailed that perhaps the company contemplated something greater, but with the return of the men to their work on Wednesday the proposition would appear to be that the extension of the depot waiting room is the chief of the improvements. Even this will be a change that can be appreciated.

Work has been commenced on the construction of the new coal storage building and loading chute, which is being erected at Vulcan by the C.P.R. The location is immediately adjoining the main track on the north side and about midway between the switches that run to the present coal bin. This will be a building of some considerable proportions, and will be equipped with power machinery and apparatus that will greatly facilitate the handling of the coal from the cars and the coaling of the locomotives. It is understood that by some change in operations, Vulcan will be made a coaling point to a much greater extent than heretofore. The turning facilities will also be maintained and improved. The entire time of a man will be required in the operation of the chute.

Starting with the last week end, summer conditions are prevailing with bright sunshine and threshing is generally under way on the last year's crop. With a continuance of this, the crop will be all in within the next week, and the results will not be disappointing; the grade and bushelage proving to hold up with the average of last year. The cost of threshing operations during this spring have been materially greater owing to the adverse conditions, but the considerable advance in the price of grains is said to more than take care of this. The present hot weather has taken out the bottom of the roads making delivery impossible in some directions, but there is slow gradual receipts at the different elevators in the town. The seeding is going in fast and practically all farmers are now at this work which will be soon completed under the most favorable soil conditions. It is expected that a large acreage of stubbling will be noticed this spring on account of general conditions, and it is considered good business this year with the soil in such favorable shape and the backwardness of the season.

## LOCAL NEWS ITEMS

The person who pines over his hard luck needs to spruce up a bit.

This is Empire Shopping Week in Canada. What have you done to observe it?

On the Saturday night following their appearance in Vulcan, the Georgian Singers and Players have a special engagement in Calgary with the Commercial Travellers Association, and these boys who are always on the road know the real entertainers.

The regular meeting of the Vulcan Women's Institute will be held on May 4th. In addition to music and song, the program will include a paper on "Flower Gardening" by Mrs. Geo. Pettman, and a paper by Mrs. Gold on "Education and Better Schools." Hints on spring cleaning, or gardening will be expected in answer to roll call.

The last regular meeting of Golden Rule Women's Institute was held at the home of Mrs. G. E. Lawrence. Mrs. Ohlheimer gave a very interesting and instructive paper, subject, "A woman's biggest job, the home and its food foundation." It was decided to again present the play after seeding. The next meeting will be held at the home of Mrs. A. Wannop on May 7th.

Officers were elected at the meeting this week of the Vulcan branch of the Catholic Women's League, and they are: Mrs. S. Slyzen, president; Mrs. H. J. Spankie, vice president; Mrs. Chas. Smith, second vice president; Mrs. L. H. Stack, third vice president; Mrs. J. Shaw, secretary; Mrs. J. D. McIntyre, treasurer. Vulcan branch will be represented at the provincial convention, at Calgary, in June, by Mrs. Herman Spankie, who was selected at this local meeting as the official delegate.

New suits and playing equipment have been received in Vulcan by the baseball club, the organization of which was recorded some time ago. The togs are nifty and nice, and were purchased with the profits of the games last season. Even if the team does not go into the local "big league," they have created a record in paying cash in advance for their equipment. The boys have been out at the diamond a couple of times, and the development in baseball will be watched by anxious fans.

Dr. Carson has decided to erect an office building. It will be located on the best available site in town, between the Pyramid Motors and the Imperial Hotel. The building will be of brick, 25x48 feet, with basement half above the street line and well finished, and the upper storey will be appointed and equipped for comfort and service in the conduct of his professional practice. Work on this building will proceed as quickly as possible. This is one more improvement that will receive mention from time to time.

Vulcan evidently was not represented at the baseball league meeting at Staveland on the first day of the week or at least Vulcan does not get a mention in the reports of the meeting that have been published. The league will consist of two Calgary teams, Staveland, Claresholm, High River, and Blackie, the latter being the nearest to Vulcan will likely have the Vulcan fans pulling for them. Reports and guesses still has them placed as the mystery team of the league. Everybody likes mystery, and this will create an added interest in the first parade and performance of the teams.

The period of April 30 to May 7, both days included, has been proclaimed "Clean-Up Week" in Vulcan. The idea is that owners and occupants of all property in town shall clean up their premises and have all the usual accumulations of winter piled in such manner as to facilitate their removal. The town authorities will give co-operation to citizens in this enterprise of cleaning and making the town healthy and attractive. Those who might fail in the duty they owe to themselves and the place in which they reside will surely receive the attention of the police department. Be it said to the credit of many that this work has already been undertaken and the labors of the tidy folks are made quite apparent.

Vulcan has a special interest in an event of April 20, and likewise a regret. It was the accidental death at Vancouver of Mr. P. N. Shaw. Deceased rushed in front of a railway train to the rescue of a little girl who was in danger, and the heroic and successful effort resulted in the sacrifice of his own life. Another man, realizing the danger also to Mr. Shaw made the effort to assist and was severely injured. The deceased gentleman, who was up in years, is well known in Vulcan, being the father of Mr. Frank Shaw, an esteemed resident of the district, and was last here following the death some time ago of another son, Mr. J. J. Shaw. Details of the accident had not been received by relatives here at the time of writing.

## A WILLIAM the FOURTH CHARTER.

THE original Royal Charter of the Bank of Montreal, bearing the seal of William the Fourth, and renewing the charter previously granted by the Legislature of Lower Canada, is well preserved in the Bank's museum.

During more than one hundred years since it was first incorporated, the Bank of Montreal has gone steadily on its course, serving the people of Canada and enjoying the unshaken confidence of successive generations.

### WHAT IS LEISURE

A recent number of Harper's Magazine has this to say of leisure: "Leisure is an unhurried, pleasurable living amongst one's individual enthusiasms, and should yield a sense of peace. With us it is rather a melodramatic escape into excitement, or a strenuous effort in self-improvement. We veer between night clubs and self-culture in our leisure. We go at it grimly. The same forces that produce our necessities, are dictating our amusements. The radio, the movies are after all mechanical and a standardized mediocre amusement, without any spontaneity of individual living which is necessary to real leisure. With others, leisure takes the form of hectic self-improvement. We take correspondence courses. We study French in ten lessons, not for love of it or to make our lives richer and sweeter, but to surprise our friends with our greatness. The automobile symbolizes our notion of leisure—the excitement of going fast. The telephone menaces serenity and integrity, more than any one other single invention. The three deadly enemies of individual leisure are—the desire for speed, the desire for luxury, the desire for first place. May we not learn to be restful and at peace for long enough to dream in our own fashion, of the things which delight us—to discover and encourage in ourselves some small field of special interest, which will absorb and enrich our leisure hours. Instead of this, we squander our precious idle hours in some way which individually means anything but leisure."

### THE FULL PAGE AD.

As the newspaper man looks over exchanges coming from various parts of the country, he is impressed with the great use that is being made of advertising. The advertising space used in newspapers has greatly increased. Take the big city dailies, for instance. If you took the newspaper, which before the war used to run an average of about 16 pages, the chances are that that paper will be running today from 24 pages to 32. The enlargement is not primarily due to the use of more news, though the space given to reading matter has increased. The big share of the increase is due to advertising. It is interesting also to see how many concerns and interests there are that are taking big ads of a half page or full page, or two pages. The fact that so many concerns are willing to put up the money for this big display shows how thoroughly standardized advertising has become, and how much it is depended upon for results by those who use it persistently and with judgment. Fortunes are being made every day through advertising and by this means a multitude of business men are rising out of small and inferior positions into leadership in the business community.

### SOCIETY'S GREAT MENACE

Easy divorce has proved to be a frightful evil in the United States. In 1926, 180,853 divorces were granted in that country, as compared with 2,622 in England, and 608 in Canada. During the ten years, 1916-25, divorces in the United States increased in ratio to marriages from 10.8 to 14.8. One in seven of all marriages now contracted in the United States ends by divorce, while in Canada, as a whole, not quite one in a hundred marriages is dissolved by any means other than death.

### DOCTOR, HOW DARE YOU?

Women who steal away for a few puffs of their favorite cigarette may feel somewhat perturbed over the announcement recently made by Dr. William P. Healy, a prominent cancer specialist of New York city. Dr. Healy is very outspoken as to his belief that smoking will prove very injurious to women, far more so than to men. In his experience he states that he has already had a few cases of cancer among women definitely traceable to smoking. He says that smoke is a definite source of irritation, and irritation of some kind is the foundation of every case of cancer. Doubtless many men have contracted cancer from smoking, particularly when the old clay pipes were much in use, but men go on smoking regardless of this, and if one dared to question them they would likely reply that very recently an old man passed away who had been an inveterate smoker since early boyhood and he lived to see 103 years slip by. Probably they would tell you that had this man left tobacco alone he might have reached 110 years, but he wouldn't have had nearly the fun or consolation he got out of the old pipe.—Canadian Elk.

### MOTHER AND SON

Mrs. Lindbergh, in a recent visit to Toronto, appears to have captivated all Canadians by her charm of manner and grace of speech. She still continues to teach chemistry in a Detroit High School although she has now no financial necessity to work. She has not lost her head through the just renown of her hero son, whose head is just as firmly balanced. No excess of adulation is going to spoil Lindbergh. His native modesty and common sense will prevent that. He certainly showed excellent taste and judgment in his selection of a mother.

### CANADIAN ARE THRIFTY

A speech recently delivered by Sir Joseph Flavelle stated that the Canadian people own \$2,900,000,000 of federal, provincial and municipal securities; that their deposits in the savings banks amount to \$1,500,000,000, and that they hold more than a billion dollars in foreign securities. That represents \$5,400,000,000 that the people have "put away," as a tribute to their thrift, but it doesn't say much for their enterprise in building up their own country and developing natural resources and opportunities for industrial expansion. With so much ready money available in this country why should we be everlastingly looking to the United States for capitalists to come over here, open up new branches of industry, and thus invigorate and bolster up Canada's industrial activities of the opportunities they are dangling before the eyes of United States capitalists, in the hope of building up their cities and promoting increased prosperity?—Toronto Globe.

### THE BENCH AND THE BAR

When the Bar of England called down the Lord Chief Justice, the public generally felt proud of the Bar. But the Lord Chief Justice was right in that for which the Bar censured him. He had called down a lawyer for telling a jury that if it found his client guilty the penalty was hanging. This lawyer had repeated it half a dozen times, the clear intent being to swerve the jury from a verdict of not guilty. A jury has nothing to do with fixing penalties, except that it may include in its verdict a recommendation for mercy. The function of the jury is to report to the judge whether the prisoner is guilty or not guilty. The penalty is imposed by the Judge according to the statutes. The incident is noteworthy as showing how deeply we love to see someone in authority being "bawled out."

Montreal talks of Toronto as a bigoted city and Toronto now retorts by challenging Montreal to elect a Mayor who is not a French Canadian.

### WITH APOLOGIES TO KIPLING

See here, you Fuzzy Wuzzy, quite at home in your Sedan,  
You would go a mile a minute, and you'll do it if you can,  
But hold 'er down a second;  
don't you see the sign says 'Stop'?  
You big, black, bounding beggar—you have killed the traffic cop!

### SAVE THE FORESTS

In Eastern Canada comparatively little timber of really prime sawmill quality is left and it is stated that 70% of such timber in Canada now stands in British Columbia. In this province also the work of devastation and waste is going on at a much faster ratio than the annual growth. A great area of forest land still remains to the north of the populated parts of most of the provinces, but this forest consists largely of spruce and other woods required for the great pulp and paper industry. This forest of recent years has come to feel full force of the United States demand for newsprint paper. It provides a very big factor in our list of profitable exports, but foresters point out we are cutting and burning at a rate that will exhaust our accessible timber supplies in twenty-five years. These experts say that with proper regulation as to cutting, reforestation and protection from fire, it is possible for Canada to have her forest industries in perpetuity. Fire has always taken greater toll than the axe. Fire prevention, the forestry men say, is the only salvation. Forest fire fighting methods are being improved. The aeroplane has been called into requisition to locate fires at their first outbreak and thus prevent fire spreading beyond control. But experience has proved to Canada's cost that fire fighting is not nearly as simple as fire prevention. Every single individual whose business or pleasure takes him or her into the woods, must, while there, be impressed with one idea above all others and that is to prevent forest fire. To that end the Hon. Charles Stewart originated an annual Canadian Forest Week in order to provide educational emphasis at the beginning of the dangerous dry season.

### THEY WERE LUCKY

There was neither success or near-success in the experiment of the Bremen. For hours the flyers did not know where they were and were apparently going around in a circle. We can applaud them for their courage and hardihood and congratulate them on their luck. They were six hundred miles off their course and hundreds of miles from their destination when their benzol was exhausted. It is doubtful if their adventure will help much in reducing the dangers of a western flight for others who may be intrepid enough to try it next.

## EMPIRE WEEK

one cannot get a proper background for Empire Shopping Week in Canada without paying considerable attention to the fact that general conditions in Canada over a long period are more stable and sound than in many other countries, largely due to the fact that many of her people are of British stock, or are strongly affected by British traditions deepened and improved by long residence in Canada perhaps, in cases, residence for three or more generations.

No excuse is needed by any Canadian for holding strongly to the view that the type of civilization and its promise of development as shown in countries of the British Empire is one that Canadians desire to encourage. It is simply a natural and right thing for a Canadian or any other British citizen to do.

It is suggested occasionally that an attitude of this sort may in some way offend the susceptibilities of our great friends and neighbors to the South. How can it when they to a great extent share the same traditions modified by North American spaciousness and freedom which Canada shares with them, but modified too by many elements which the most loyal citizens of the United States themselves would say do not tend to raise the average of their civilization. Does that not make it all the more desirable for those who respect Canada to see that her more purely British and Canadian civilization is maintained.

Then, in purely trade matters, we all recognize that there must be very extensive business transactions between Canada and the United States. Many things because of convenience, because of cheapness, because of amplitude of supply will always find their way back and forward across the border.

Certainly no attempt is being made to upset economic laws. No country is more strongly seized of the idea of protecting its own industries and encouraging the purchase of goods made at home than the United States. However, the Governments of British countries throughout the Empire practically without exception reflecting what they think to be the feeling of the population at large, have established a system of granting preferential rates of customs duties or their equivalents to assist the entry of goods produced or made in other parts of the Empire.

### ARE YOU A THUNKARD?

If a male goose we call a gander,  
A male moose must be a mander.  
If one who fails is a failure,  
Then one who quails is a qualifure.  
If a female duke is a duchess,  
A female spook must be a spuchess.  
If drinking too hard makes a drunkard,  
Then thinking too hard makes a thunkard.  
—Boston Transcript, which credits the first of the above verses to "Exchange."

If ignorance is bliss, why isn't there more happiness in this world?

## A RICH COUNTRY

Charlie Planinshuk, the farthest north farmer in Canada, who has a homestead at Frog Portage, on the Churchill River, where he has been carrying on experiments for the government experimental farm at Brandon, has now got his eye on the mineral wealth of the district. Charlie has been in the habit of coming to town once a year to sell his furs and take back supplies, for, although he grows his own vegetables, grain, etc., and makes his own flour, there are still a few other things he likes and cannot grow.

This year he came down and caught the mining fever. He arrived in town about two months ago, listened to what was going on, and turned back to Cold Lake to get a practical education in prospecting and find out just what he was to look for.

He arrived in town this week and states that he has been trapping over the largest copper deposit on the continent. He cannot see anything wonderful about the Flin Flon or Sherrit Gordon, but thinks they are small compared to what he has seen—and he has probably covered more of this northern country than any other white man.

He says there is lots of copper at Reindeer Lake but predicts that the next big rush will be to White Mountain, 200 miles west of Reindeer Lake. This has been his winter trapping ground for years and he says that the formation is exactly similar to that at Cold Lake, only there is not so much overburden. He did not pay much attention to it at the time, as he did not know what it was. The country around Baker Lake, he says will also be a great copper country. This is about 1,000 miles from The Pas, but will be easily reached from Fort Churchill, via Chesterfield Inlet. When asked about the Black Fly pest mentioned in Professor Tyrell's report, Charlie only laughed and said he has been there at all seasons and was still alive.

Although he has got the mining fever, Charlie "knows his onions." On his return trip he will guide in a party of prospectors to the Reindeer Lake district which is about 100 miles from his own place—he mentions 100 miles as if were around the corner—and expects to get a lot of business, one way or another, from prospectors coming into his country. He maintains that the Barren Lands will be the great prospecting country of the future and he is sitting on the door step ready to welcome them.

Speaking of the caribou in the north, Mr. Planinshuk says that they seldom come further south than Pelican Narrows. He says that he has seen Reindeer Lake, which is about 30 miles across, covered as if with a big grey blanket. One time he just got behind a big rock in time to save himself and his dogs from being trampled to death. They do not move fast he says, but they keep on going and a man caught in front of a big herd would have a poor chance.—The Pas Herald.

## LIQUOR PROFITS

In connection with statements which appeared in the press regarding liquor in Ontario and Alberta and quoting the former as making 15 per cent. profit on sales and the latter as making 41 per cent., the following statement is issued by R. J. Dinning, Liquor Commissioner for Alberta. It may be pointed out that the Ontario figures included sales of beer totaling \$6,367,416, but the Alberta figures omitted the sales of beer in this province, although all the profits on beer were included. In five months Ontario is reported to have sold:

Wine and Spirits	\$11,166,243
Beer and Stout	\$ 6,367,416
	\$17,533,659

on which a profit of \$2,533,659 (five months) was made on actual sales or approximately 15%.

In twelve months in Alberta the following sales were made:

Liquor and Wines	\$ 4,582,349
Beer sold thru stores	\$ 306,500
Beer sold thru breweries and brewery warehouses under Govt. supervision, approximately	\$ 4,500,000
	\$ 9,358,849

on which a profit of \$2,038,622 was made (including gallowage tax and license fees of \$565,005) or approximately 22% on the total sales, not 41% as suggested in the daily press. From the viewpoint of the Liquor Boards, the system of handling beer in Ontario differs very little from that of Alberta in so far as the cost of operation and supervision is concerned, thus in comparing the net profits it is only fair to include beer sales in both provinces.

## Good Business Methods mean Good USED CARS

GOOD business conditions . . . high sales-records for Chevrolet cars . . . sound methods of operating . . . all combine to make possible the standard of Used Car quality which we maintain. This quality standard has never been so high . . . yet prices have never been so attractively low.

Buy your used car where you can buy with confidence. Our reputation as Chevrolet dealers provides assurance of lasting satisfaction, whether you buy a new or a used car here. Let us show you some of our most compelling values.

## MOTOR-ELIXIR [MOTOR LIFE]

Motor Elixir is a lubricant which is dissolved in your gasoline. When the gas is ignited in the engine the Motor-Elixir is sprayed on the cylinder walls, valves, valve stems, valve seats and carburetor chamber. Thus Motor-Elixir provides perfect lubrication of the overhead parts of the motor for the first time in automobile history.

Motor-Elixir eliminates the excessive friction which wears out cylinder walls and pistons. The film of Motor Elixir seals the engine and gives greater compression. Motor-Elixir cleans out the carbon already deposited and keeps the motor free from deposits.

Now at last Motor-Elixir is available for Western Canada motorists, and so simple to obtain! Just drive into Stuckey's Service Station at Vulcan and ask for "lubricated gas". Your tank will be filled with lubricated gas having the correct proportion of Motor-Elixir.

**FREE! FREE! FREE!**

An expansion of Canada's air mail service by linking up with the trans-continental services of the United States is under consideration by post office officials. Some definite information relating thereto is looked for within a few days.

The export of alcoholic beverages from Canada continues to increase at a remarkable rate. The total value of these in the twelve months ended February was \$14,211,816 as compared with \$28,646,039 in the previous twelve months.

**MOTOR ELIXIR**

Stuckey Service Station the Vulcan Agency

In an interview with Mr. Stuckey of Stuckey's Service Station, he announced that he had been appointed sole distributor for Vulcan and surrounding district for Motor Elixir (lubricated gas). In order to explain this new departure in the automobile industry re-copy a report on Motor Elixir made by a prominent oil engineer which explains very fully the use of this oil. The report is as follows:

Motor Elixir is a true lubricant for the overhead lubrication of gas engines. It is composed of four oils—two vegetable and two mineral—every one being a true lubricant. It is the scientific blending of these four oils to that degree of perfection where they merge into one, are soluble in gasoline, and atomizes perfectly with the gasoline that comprises the secret formula used in making the finished product. Motor Elixir is a perfect lubricant containing no free carbon, acid or chemical and there is no substitute.

Motor Elixir being instantly dissolved in the gasoline, atomizes perfectly in the carburetor. It does not burn when the gasoline is ignited but throws a spray of oil over the cylinder walls, valves, valve stems and carburetor chamber. This film of oil allows perfect lubrication at all times eliminates friction and gives better compression.

Motor Elixir has been tested by usage until its superior qualities are established facts. Chemical analysis shows no trace of acid, chemical or free carbon. There is positively nothing in the oil to harm the engine.

Mr. Stuckey will be pleased to explain this new overhead lubricant more fully to any one interested. He firmly believes it will prove the blessing of the age to motorists.

A cigarette butt is not out when you throw it away unless you know it is out. That's the only safe rule to go by. Millions and millions of acres of good pine forests would be available for better logs than are generally available today, if smokers had always practised that safe rule.

An increase of \$40,768,160 in the value of crop and livestock products actually exported from Alberta during the crop year 1927-28 as compared with the year 1926-27 is shown in a publication recently issued by the W. Sanford Evans Statistical Service of Winnipeg. The total value of the grain and livestock shipped from the province in the crop year 1927-28 is placed at \$150,980,167 as compared with \$110,212,007 in the previous year. Increased exports are shown from each of the eight crop districts into which Alberta has been divided for the purposes of the report. Figures for the nine districts in Saskatchewan show total returns in 1927-28, of \$233,218,016 as compared with \$227,614,526 in 1926-27, an increase of \$5,603,490, while Manitoba shows a decline of \$24,019,513, the respective figures being \$46,684,315 in 1927-28 and \$70,703,828 in 1926-27.

**ITEMS OF INTEREST**

Germany is now a big purchaser of Canadian goods. Gradually we are all beginning to forget about the Great War.

There has been a big run on tractors, seeders and ploughs. The demand for tractors and ploughs could not be met.

Harry F. Sinclair charged with conspiracy to defraud the U.S. Government in connection with oil leases and with having contributed to one Albert B. Fall, the sum of \$269,000 was acquitted by a jury.

On Saturday next Hon. William Phillips, U.S. Minister to Canada, and wife will be guests of the city of Calgary. The appointment of Mr. Phillips as ambassador to Canada has given Canadians much satisfaction.

The Calgary Automobile Club is planning to equip and operate the most modern automobile tourist camp in western Canada this summer, it is announced by F. R. Brason, president of the Club. A splendid site is being selected and the camp will be equipped with light, gas water, shower baths, cookstoves, car shelters and other conveniences for the accommodation of motor tourists.

Liquid air in bottles similar to quart milk bottles, to be used in refrigerators in place of ice, is one of the latest developments. An attempt is now being made to market this product in Canada. It is stated that one bottle of liquid air in a refrigerator will keep it at the proper temperature for one week, and the cost is estimated at ten cents per bottle in Canada. If this plan works out as described, it may bring another change in the matter of refrigeration doing away with the bulky ice box of ordinary refrigerators. There are days of rapid change.

Some outstanding wheat facts in Canada are that the crop of 1927 of 140,000,000 bushels was the second largest in its history, representing a value of \$457,000,000 or nearly \$50 per head of every man, woman and child in the Dominion. Wheat is now Canada's greatest single item of production being 39 per cent. of the total agricultural production. 75 per cent. of the quantity exported going to the United Kingdom. Canada exports her wheat and flour to sixty countries.

The Illinois-Alberta Oils, Limited, sold during the year ending March 31 31,822 barrels of crude naptha, worth \$125,652.25 and sold gas to the value of \$5,150, according to the financial statement which has been forwarded to shareholders in advance of the annual meeting, which will be held on May 7. The operating account for the year shows a total expenditure of \$44,813.94 while the total revenue is listed at \$131,185.77. The net proceeds applied to reduction of development account amounted to \$86,371.77. The balance-sheet shows that Well No. 1, with subsequent development, cost a total of \$1,091,693.79. Well No. 2 to date has cost \$44,790.61. Leases and oil rights are listed at \$31,410.00.

The Department of Education has just issued a manual in Civics intended for use in the High School grades. This little booklet of approximately seventy-five pages contains material with which every citizen should be familiar. It was written by Professor Burt of the University of Alberta, admittedly an authority on this subject. While the treatment follows in a general way the topics included in the civics section of the third year History course, yet nothing has been included that is not of genuine interest to anyone who desires a brief statement, not only of our present practice in government, but the foundations on which it rests. This is the first Canadian publication dealing with civics on the high school level and it will without doubt make a suitable text for discussion clubs, U.F.A., U.F.W.A., and Women's Institute meetings, as well as a valuable handbook for private reading. It is published by the School Book Branch of the Department of Education and may be had direct from this branch for 30c post-paid, or from local dealers.

In the way women by thousands are turning to Essex is the story of the great and dynamic "Man's Super-Six" made beautiful for women—roomy and comfortable for all the family.

The stunning exterior grace and finish of the new Essex is carried on and heightened by the interior details of comfort, convenience and appearance.

You sit upon high backed, form fitting seats upholstered in material that tells its quality to sight and to the touch.

You have before you every control in their most natural and handy place. The starter on the instrument board for instance, saves many a torn hose and soiled glove. And all about you, the paneling, the weatherstripped doors, the silenced body construction, the floor matting and the hardware in graceful silvery patterns speak quietly and certainly of quality.

In these and such things as the black rubber, steel-core, finger-scaled steering wheel, carrying light, horn and throttle controls, the worm and tooth disc steering mechanism and the vertical radiator shutters, Essex visibly duplicates costly car practice, as it does also in the hidden things you never see.

May we demonstrate, please?

Canada's gold production in 1928 will be between \$44,000,000 and \$47,000,000 which gives the Dominion a place ahead of the United States and second to South Africa.

Approximately 40,000 bushels of registered Marquis wheat and Victory and Banner oats were cleaned, graded, registered and marketed by the Provincial Cleaning and Grading Plant at Edmonton during the past winter, States Field Crops Commissioner, W. J. Stephen. In addition a considerable quantity of high grade registered and number 1 seed has been sold on commission for farmers whose grain was not accepted at the plant, and a further 25,000 bushels of registered seed could have been disposed of if it had been available. The fact that fully 95 per cent. of the grain passing through the plant was sold to Alberta farmers indicates a recognition of the value of seed grain which is clean, of good quality and true to variety.

Alberta stands fourth among the provinces of the Dominion in the value of its mineral production, according to the recently issued preliminary report of the mining branch of the Dominion Bureau of Statistics for 1927. Ontario leads with a production valued at \$89,109,865, or 36.44 per cent. of the Dominion total; British Columbia stands second with an output valued at \$60,188,131, representing 26.41 per cent. of the aggregate for the Dominion; Nova Scotia with an output valued at \$29,554,822 held third place and contributed 12.08 per cent. of the total; closely followed by Alberta with a production of \$29,375,040, constituting 12.02 per cent. of the total.

**Why Gum-Dipped Tires Cost Less "Per Mile"**

The demand from car owners for Firestone Gum-Dipped Tires has given Firestone Dealers a large increase in volume that enables them to sell these tires to you at the lowest prices in the history of the industry.

The Firestone Balloon Tread, scientifically designed three years ago, and unchanged today has the wear-resisting qualities that give thousands of extra miles.

This tread must be placed on a carcass that has the qualifications to withstand terrific flexing. The Firestone carcass is made of cords dipped in a rubber solution which not only saturates and insulates every fibre of every cord, but unifies sidewalls with carcass, eliminating any possibility of separation under the extreme flexing of low-pressure tires.

The Firestone Dealer in your locality will gladly explain the Gum-Dipping process, the scientifically designed tire tread, and other advantages that only Gum-Dipped Tires can give. See him today.

Vol. 1. VULCAN, APRIL 27 No. 8

## Vulcan Herald

Published in the interests of the People of Vulcan and the Farmers and the Farmers of the District.

R. J. MONDS, Editor.

### EDITORIAL

As we approach the first days of May it seems to us we are reaching the happiest time of the year. But happiness is shy. It steals into your heart while you are busy doing for others, and cannot be captured by one who devotes his time to chasing it.

We were very pleased to learn that Bob Robbie won a bet from his neighbor on the pulling qualities of the McCormick Deering tractor.

Perhaps they call them "grounds" for divorce because they are usually made of dirt.

NOTHING UNUSUAL. Fifty acres of seeding a day is nothing unusual for our western farmers who hitch their 28-furrow McCormick Deering Grain Drills behind their McCormick Deering Tractors and seed a strip fourteen feet wide at every trip.

A fine way to break your back in the spring is to walk into the living room in the dark and sit down where the davenport was yesterday.

Most of the women who get mad over being called the inferior sex are in the habit of getting mad about something anyway.

### FOR SALE

We have for sale 1-1927 FORDSON TRACTOR in A1 shape; 1-24 inch John Deere GANG PLOW almost new at a bargain price; and 1-11 ft spring tooth CULTIVATOR.

A fat man says: "Worry will make people thin, except when they worry over being fat."

Spring is here!

"They say that your daughter is making money hand over fist."

"Yeh, but the manicure business isn't what it used to be."

We wonder how anything so very scarce ever got to be called common sense.

We have been so busy these days delivering plows, drills, cultivators, and tractors that we have not given our paper much attention.

## OUR BIG GRAIN CROP

Great Developments Expected in Canada as a Result of Our Big Grain Crop

Eventually Canada will produce a billion-bushel crop of wheat annually and will have no difficulty in finding a market for it, predicted Hon. T. A. Crerar, president and general manager of the United Grain Growers, Limited, former Federal Minister of Agriculture for Canada, in a recent address. The annual crop of wheat produced in the Dominion is now close to half a billion bushels. Last year it was over 440,000,000 bushels.

Referring to the development of Western Canada, Hon. Mr. Crerar said there was no country in the world where so great a development had taken place in the past forty years as in the Canadian West, and there was no country which had so great potentialities. Speaking of the export of grain he said that the Dominion was exporting wheat to every country of Europe, also to the Orient, and declared that with the population of Europe growing at the rate of 2,500,000 every year it would be an ever-growing market for the product of Canadian farms.

Canada is admirably located to furnish these supplies, he pointed out. The United States with its population of nearly 115,000,000, and growing at a rate of from 1,500,000 to 2,000,000 every year, would soon cease to be a food-exporting nation as it was already importing foodstuffs in increasing quantities from Canada, such as dairy and other products.—Toronto Globe.

### CROP OUTLOOK ENCOURAGING

James L. Richardson, one of the leading grain merchants of Canada, visited Alberta the other day and expressed his belief that conditions are ripe for the production of another fine crop in Alberta this year. Hon. George Hoadley, Alberta's minister of agriculture, gave voice to a somewhat similar remark, and told Albertans not to worry if the Spring appeared to be late—that seeding and harvest would follow in their usual course. There is no doubt that the outlook is very good. There is a plentiful supply of moisture deep in the soil as a result of a very wet fall and a winter in which more than twice the average snowfall has been recorded. Farmers generally have some land prepared for seeding, and they have more horse power, tractors considered, and better machinery with which to seed the crop. There will be a much larger acreage seeded in South eastern Alberta, where, fortunately, the moisture supply is ample. So that barring extreme drought in June and July, we ought to look forward with confidence to another good crop this year.

Due to the closing their plants the surplus and reserve funds of the Ford Company fell to the extent of \$47,000 in a year. The surplus and reserve funds combined at the close of last year amounted to \$668,593,092 compared with \$716,508,846 a year previous.

## BABY MURDERERS

The Crow is Not Only a Murderer But is a Shrewd Thief.

In glancing over the many articles written on the crow in our Canadian papers, I notice several writers fall back to this old worn-out argument, "Interfering with the balance of Nature." I would like a full explanation of the meaning. Does it really mean that no person should attempt to assist Nature? If that is what you are trying to tell me, let me kindly say you are wrong, for I have tested it out and know if man will take God at His promise and work in harmony with Him that man can even change the migrating route of the fowls of the air.

My esteemed friend, Mr. Thos. Baty, of London, Ontario, kindly says "If Jack ever had a pet crow he never would kill it." Really this makes me laugh. Say, I wonder if there is a man in America who has gathered up more pets from the woods than I have. Crows, crows, why bless your life, I have had them by the dozens, and I will admit they are just as cute as they are black. I once had one that would say, "Look out!" so plain and sharp that he would cause you to flinch, but I never kept but one to be over a year old. Then he, like all the rest, died guilty of murder in the first degree.

In 1898 I enclosed four acres with a wire fence seven feet high. There I raised English and ringnecked pheasants for profit. This pheasantry was right alongside of my brick and drain tile manufacturing plant. I could watch my machinery and overlook the pheasantry all from the same spot. In this way I made my hobby gathered stores of knowledge about the enemies of our birds, and let me say to any young man, breeding game birds for profit is a lovely occupation, and there is good money in it. The seven-foot fence is not necessary.

All that is required is a dog proof fence, but remember, unless you educate yourself how to destroy their enemies, you had better give up the job about two weeks before you start. For this little innocent-looking weasel that is no larger than a northern Ontario chipmunk, will kill from twenty to thirty of your baby pheasants in one night and crawl through one inch mesh wire netting to do it, but remember, you are "interfering with the balance of Nature" if you kill him.

I believe the indoor naturalist calls him the mouse weasel because the majority of his food is mice. Crows must be checked or they will steal every egg laid unless your brood pens are under netting. But, after the young pheasants are hatched, I found the hawks and weasels their worst enemy. Fifty rods due north of this engine room door is an elm tree, and morning after morning have I seen a crow perched in the top watching my neighbor's turkey hen come through the line fence just ninety rods east of the tree. Mr. Crow would sit and watch, and the very minute the turkey came out of the fence row and started back toward home, he would fly straight over and get the egg she had laid. This could all be seen with field glasses.

Smart? I should say so. They are the shrewdest thieves of the bird family, but you say to kill one you are "interfering with the balance of Nature," for God put them here. Yes, I say, God also put the bed bug here but He gave man dominion over them and the present generation wouldn't hardly know one if they saw it. Crows! God did not put them here to control our poultry, nor our song, insectivorous and game birds. He did not even allow them the privilege of controlling themselves. He left all of this for man to do. Please think that over and look up what he says regarding this point. And, as for the grasshoppers the crows eat, this turkey hen's family would condense all them into a Thanksgiving dinner or into twenty-five or fifty cents a pound just as you choose.

Now I am not contradicting a word which has been said about the crows eating a few wire worms and grubs and so forth, but here is what I know about it. If he can find them, he will rob at least one hundred of our more desirable birds' nests in order to raise his family of four or five, while, if any one of these murdered song and insectivorous birds were left to mature, would do twice as much good as a crow ever did.

Now if a man wants to make money, man must study money. The prospector is more apt to find earthly gold than the astronomer. In other words, if a man concentrates on one line he more apt to catch something on that one hook.

My friend, Mr. Baty, says if I had had a pet crow to study their habits I would know more about them. Let me reply to my friend and kindly say, when he has studied them enough to catch them by the thousands he will know more about them. Personally I have studied birds more than I have my financial obligations, and I am glad of it. They have brought me closer to God and man. If my life's study hasn't taught me something about the habits of the crow, how did I catch five hundred and ten of those organized murderers at one catch? Will you please think over? I do wish there was nothing but good in the ways of all birds, for I don't want to kill any of them, but how can I be humane and protect a baby murderer?

## CREAM THIEVES

So far as Western Canada is concerned the dairy cow stands pre-eminent among farm animals as a means whereby farmers are assured of revenue that will prove more stable than straight grain farming. The milk cow is a wonderful and profitable factory. She is endowed with the inherent power to transform grains, roughages and water into a most delicious food. Her milk and milk products comprise food substances that are appetizing, nourishing and wholesome; and if she is well bred, rightly fed and carefully looked after she will return to her owner in butterfat and other products from \$2 to \$5.00 for every dollar's worth of food she consumes. Such a cow pays the farmer a monthly dividend, and in addition provides a calf, which is a stock dividend that counts.

Dairying and mixed farming in the Canadian West is steadily on the increase. There is an increase in our dairy cow population, and in dairy production. It is, therefore, all the more deplorable that from the standpoint of the farmers who own and milk cows, a large annual loss in revenue is apparent, due to the inefficiency of milk separation on too many farms.

Some farmers are heard to say that dairying does not pay. The man who makes such a statement generally does not know whether it is true or not. It may be true as regards his operations, but the remedy invariably lies in his own hands. The cow owned may be the wrong kind to produce profits. Again, the farmer may only be milking in the season of high production and comparatively low prices. If fall and winter dairying is attempted, proper provision may not have been made during spring and summer for an adequate supply of inexpensive feed. These and many other factors affect dairy profits. But there is one factor that is costing the owners of cows an enormous annual loss, and that is the "Cream Thief" type of separator.

There are thousands of these cream thieves in the farms of Western Canada. Some are doubtless honest separators when put into service, but through long use and abuse, have lost their ability to make full returns from the milk which they skim. Some are dishonest at first and become more so with every day of use. The pity of it all is that the owners of such machines do not realize that they are being robbed at home. Thousands of farmers to-day are losing the product of one good cow annually through the fact that they are separating their milk with a wasteful cream separator.

It is true that we want more and better cows in our Western Canadian farms, but if the creameries received the butterfat which is stolen annually by the "Cream Thief" separators, this would be equivalent to a very large increase in the cow population of the four Western Provinces.

### NO EPHS NOR CAYS

The following, clipped from the Rocky Mountain Cyclone, shows how completely the English language is adapted for sudden and unforeseen emergencies:

"We begin the publication of the Roccay Mountain Cyclone with some phew difficulties. The type phounders phrom whom we got our phound phailed to supply us with any aphs or cays, and it will be phour or phive weex bephore we can get any. The mistake was not phound out till a day or two ago. We have ordered the missing letters, and will have to get along without them till they come. We don't like the loox of this variety or spelling any better than our readers, but mistakes will happen in the best regular phamilies, and iph the ephs and cays and x's and qu's hold out we shall ceep (sound the e hard) the Cyclone whirling, aphter a phasion, till the sorts arrive. It is no joque to us—it is a serious apphair."

"Establishing a New Standard in Automobiles"

# THE NEW DURANT FOUR

The Durant Four "Rideau" Sedan  
Built in seven models, Rideau Sedan (illustrated), Executive Sedan, Touring Sedan, Coupe, Standard Touring, Special Touring and College Roadster.

When you see the new Durant Four you will realize that this car positively sets a new standard for automobiles.

You will be impressed by its size, its newly designed radiator and the very modern lines of its Durant Built Hayes-Hunt body.

After you have examined it thoroughly the fine upholstery . . . the comfortable seats . . . ask for a demonstration.

The improved Red Seal Continental Motor will surprise you. You will unconsciously

compare its power and speed with that of six cylinder performance. The long wheel-base, the greater flexibility of the motor and the Bendix 4-wheel brakes give you that satisfaction usually associated only with more expensive cars.

Convince yourself that there is no four cylinder car on the market that looks better, rides easier or offers more value per dollar than the new Durant Four . . . Ride in it . . . Drive it . . . Yourself!

### OBITUARY

Passing of John Burr, Well Known Former Resident

The death of Mr. John Burr, Sr., which took place at the home of his son, Mr. R. H. Burr, at Gilby, Alta., on Tuesday, April 17th, was the cause of great sorrow among his many relatives and friends. The funeral took place on Saturday, April 21st at 2 p.m., when a short service was held in the United Church, Vulcan, where the Rev. Mr. Brunton of Vulcan, and the Rev. Mr. Carroan of Gleichen, conducted the service, after which interment was made in the family plot in the Highland cemetery. The deceased was well known throughout the districts of Gleichen, Arrowwood and Vulcan. He was born in 1843 in the township of Smith, Country of Peterboro, near Peterboro, Ontario, and came west to Gleichen about 18 years ago, and has been in this vicinity most of the time since. He leaves to mourn his loss five sons and three daughters, namely: W. L. Burr, of Sylvan Lake; Richard H. of Gilby, John W. of Armand, Man.; David near Vulcan, and Rupert E. of Vauxhall, Alta. The daughters are, Mrs. Elizabeth Speer of Vulcan; Mrs. S. F. Scott of Edmonton and Mrs. Jos. McCann of Arrowwood.

The deceased was married in his twenty-eighth year to Sarah Frances McCurdy of Tara, Ontario, whose death preceded his five years ago at Arrowwood. He was converted in early life and from that time on was a staunch member of the Methodist and United Church, and devoted many years of his life as a local preacher of the Gospel and Sunday School work. Previous to coming west he was engaged for 27 years as school teacher in the Government Indian school at Chippawa Hill, Ontario. His Christian faith in his Maker and Saviour was unbounded, and he died with a feeling of security of the promise of the dawn of an Eternal Life in Heaven.

He was called from this world of sorrow leaving sweet memories of love. But his soul shall live forever in a beautiful world above. And through the gates of Heaven His loving arms will stretch some day.

To welcome those who are grieving. For him who has passed away. Beautiful floral tributes were received from the following: The Family; U.F.W.A. of Arrowwood; United Church of Arrowwood; Grand Children of Mrs. S. R. Scott's family; Grandchildren of Mrs. W. Speer's family; Mr. and Mrs. McCann; Miss Mary McCann; Mr. Howard Salter; Mr. and Mrs. McMullen; Mr. and Mrs. Wm. Mawer; Mr. and Mrs. Gordon Moisse; Mr. and Mrs. Glenn House.

The pallbearers comprised of four sons and two sons-in-law, Messrs. J. McCann and Mr. Nat Speer.

St. Aldhelm's Church services, Sunday, April 29. Sunday school 10 a.m., matins 11 a.m., evensong 7:30 p.m.

### ITEMS OF INTEREST

Spring is so rich it ought to pay green fees.

Borrowers would be a great deal happier if bankers were as anxious as singers to hold on to notes. Louisville Times.

More business is being done in the farm implement trade in Western Canada this spring than at any time in the past fifteen years. One striking feature is that the majority of these purchases are for cash, and another is the amount of dairymachinery which is being purchased by farmers.

Chief Justice Harvey, Mr. Justice Twomey and Bishop Sherman will be the judges at the finals in the oratory contest between Arthur Cragg of Calgary and Miss Margaret Kinney winner up north. The contest will take place in First Baptist Church, Calgary, Tuesday evening, May 1st.

Arrangements are being made by the Broder Canning Co. of New Westminster, B.C. to open up a number of test plots in the irrigated districts surrounding Lethbridge for the purpose of investigating the possibilities for growing vegetables for canning. At least 600 acres for the growing of peas would have to be signed up.

### ENSIGN NEWS

Mr. C. E. Dovey has shipped another carload of potatoes to Calgary this week.

Work has been started on the tennis court, and tennis will soon be in full swing.

Mr. Fred Masse has returned to St. Clouds, Manitoba, after visiting a few days with his brother, Mr. J. Masse.

Mr. A. R. F. Ferguson, from Toronto, is visiting with his sister and brother, Mrs. W. Burdon and Mr. J. Ferguson.

Ensign Church services every Sunday afternoon, Sunday School 2:30, Church at 3 o'clock. Preacher Rev. Mr. R. Harden. All are welcome.

The sum of \$17.50 was contributed by the members of the Ensign Church and five dollars was donated by the Ladies Aid which totalled altogether the sum of \$22.50 in aid of the Bible Society.

The people of Canada can hardly realize how fast fire and axe have eaten into Canada's forest resources during the present generation. Forestry experts state that of what was a primeval forest no farther back than 1810, practically untouched by the axe, little more than one-quarter now remains.

### ITEMS OF INTEREST

The great test of patriotism at this juncture is the income tax.

A Masonic temple will be erected in Calgary this year to cost \$100,000.

When will Canada learn that her forests must be "cropped," not "mined"?

Before attempting a return trip to Europe the crew of the airplane Bremen will no doubt carry four-leaved shamrocks as well as fuel.

The council of Cardston will spend \$10,000 and fix up its streets with gravel this year. It will improve the links with the Waterton Lakes road ensuring a good route for tourist traffic this year.

When a man who is not used to the woods lights a match and later throws it on the ground, he expects it to go out. But when an experienced woodsman is through with his match it is out. He does not leave it to expectation. He knows.

The number of dairy factories in operation in Canada during the year 1926 was 3,017, an increase of 35 over the preceding year and an increase of 114 over the year 1921. The total for 1926 comprises 1,269 creameries, 1,418 cheese factories, 334 factories making butter and cheese, and 26 factories making condensed and evaporated milk.

The inhabitants of Philippolis, Bulgaria, blame the government of that country for an earthquake that occurred there on April 21. For the first time in the history of Bulgaria, a session of parliament was held on Good Friday and the people are convinced the catastrophe was punishment for this unholy act. More than 12,000 families are homeless.

Lethbridge is learning the value of co-operation. They are finding that, by working together, they can do many things for themselves and for the community which cannot be accomplished individually. This is being reflected in the business life, commercial life and in other avenues, and as a result Lethbridge is becoming every day a better place to live in, says the Herald.

Motorists entering the Rocky Mountain Park (Banff) this year will pay a flat rate of \$2.00. This is for all cars and will supersede the rate of \$1.00 for a transient license good for three weeks and the rate of \$4.00 for a seasonal license. Upon the payment of the new fee, the motorists will also receive one month's camping privileges on the regular camping grounds established throughout the parks.

With wheat yielding approximately thirty bushels to the acre, with an expected grading of between four and five, threshers have started operations on the 1927 crop of Hon. O. L. McPherson, minister of public works, which was snowed under in the stock last fall on his farm at Vulcan. The minister was here Monday on his return to Edmonton after starting the threshers on a quarter section of wheat and 100 acres of oats on his farm. Mr. McPherson will operate his big farm this year under his personal direction as he has been doing the last few seasons.

### BRANT NEWS

Messrs. B. R. and A. B. Parker expect to complete the placing of a cement floor in their new garage this spring when they will be prepared to attend to the needs of the people generally in garage work.

Canadian Forest Week is an effort to make the people of Canada think, and no work that the Honorable Charles Stewart sponsors will be more fraught with results if it accomplishes its purpose, and the Canadian people realize the need for care in preventing fires in the forests.

The Brant Hotel is now under the management of Mr. Steve Bassette and he is having improvements made that will spell comfort for guests who stop there. The dining room is in charge of Mrs. Bassette and only white help is engaged. The meals served are delicious and wholesome and a courteous service is extended all patrons.

With favorable weather prevailing throughout the entire district there was much activity at every farm along the Vulcan, Brant and Blackie route. Where last year's crop of grain remained unthreshed, threshing crews were at work and reports came that the yield was excellent and the quality up to expectations. Other farmers were engaged in seeding, plowing or cultivating, in which tractors are playing an important part and working twenty-four hours each day. According to present estimates there will be an increase in acreage sown to grain this year over last.

While engaged in using her electric washing machine on May 16, Mrs. H. A. MacNeil of Brant, met with an accident that caused her much pain. While wringing, her hand was caught in a fold of a towel and drawn into the wringer and before the power was shut off, she suffered bad bruises to her fingers. Fortunately Mr. MacNeil was within hailing distance and he immediately pried up the wringer and released the imprisoned hand. Mrs. MacNeil was taken to High River hospital immediately and an x-ray examination brought out that no bones were broken.

### FOR SALE

FARM EQUIPMENT—Two Waggon and Bunkle Racks, \$35.00 and \$50.00; Round Water Tank, 12-barrel, out one year; shallow well Stock Pump, out one year; also quantity Early Seed Potatoes. F. M. Maiden, Phone 1107, Vulcan. Apr13/28
